Workfile Status

- **Workfiles received; ongoing 3M analysis:**
 - USS Anzio (CG 68) - completed 24 month analysis
 - USS Port Royal (CG 73) - completed 24 month analysis
 - USS Hewitt (DD 966) - completed 18 month analysis
 - USS Laboon (DDG 58) - completed 24 month analysis
 - USS Russell (DDG 59) - completed 24 month analysis
 - USS Austin (LPD 4) - completed 24 month analysis
 - USS Duluth (LPD 6) - completed 24 month analysis
- **Workfiles received; workfile identification in process:**
 - USS Normandy (CG 60) - Problem setting up metrics!
 - Availabilities: ROH 5/28/98 - 2/2/99; current avail 2/5/01 - 10/5/01.
 - Workfiles rec'd for date range: 11/1/99 - 10/30/00.
 - Incomplete workfile package for either availability
 - USS Boone (FFG 28) - shredding out workfiles
- **Workfiles received; not yet processed:**
 - USS Caron (DD 970)
 - USS Milius (DDG 69)
- **Workfiles requested:**
 - USS Tarawa (LHA 1) - NNSY - funding?
 - USS Saipan (LHA 2) - NNSY - funding?
 - USS Ashland (LSD 48) - Boston - workfile parameters forwarded
- **Workfiles not available:**
 - USS Dallas (SSN 700)

Metric: Allowance Effectiveness

USS Laboon (DDG 58) Monthly Allowance Effectiveness

- More than 30% of all maintenance on-board a ship is being deferred due to “lack of parts” – why didn’t the ship have the part?
- Allowance Effectiveness measures the % of parts that were issued for maintenance that had an allowance in the ship’s SRF in SNAP.
- Configuration accuracy is a key driving factor in maintaining correct allowances on board ship.

Metric: Count of 'G' Source Coded Issues

USS Laboon (DDG 58)
G Source Coded Issues

Count of 'G' source coded issues recalculated as if validations had not happened (i.e. worst case scenario)
Measure difference

Count of 'G' source coded issues as reported by 3M

- Definition of a 'G' source code: 'Not Carried' repair part issued for maintenance which is not listed on an APL in the ship's COS file in SNAP.
- Causes for a 'G' source coded issues are configuration inaccuracies and/or provisioning problems

Potential G Source Coded Issues Avoided due to All Validation Efforts - Over Time
